

VACHHANI RUCHITA

Software Developer

Results-driven IT professional with a solid background in software and web development. Experienced in working with a wide range of technologies including HTML, CSS, JavaScript, React.js, SQL, WordPress, PHP, and Laravel. I enjoy crafting responsive, user-friendly applications and thrive on solving complex problems through clean, efficient code. Looking for an opportunity to contribute to impactful projects while expanding my skills in cutting-edge development tools and frameworks.

Experience

May
2024

Bytexl

- Worked on the skills like System Testing, Web Development, MEARN Stack, DSA, under Summer Internship 2024.

June
2024

Nov
2024

Cyber Hospitality

Project

Encryption/Decryption Techniques Tool

<https://crypto-learn.vercel.app/>

This interactive tool helps users learn classical encryption and decryption techniques through real-time visualization. It supports Caesar, Monoalphabetic, Polyalphabetic, Playfair, and Hill ciphers. Built with React.js and JavaScript, it offers a dynamic interface with instant results and visual aids to enhance learning.

Cyber Hospitality

<https://cyberhospitalities.com/>

The website is built using a combination of modern web technologies and frameworks. The frontend is developed with HTML, CSS, and JavaScript, ensuring a responsive and user-friendly interface. On the backend, PHP is utilized, likely within a framework such as Laravel, to manage server-side operations and database interactions. Additionally, WordPress may be employed for content management, allowing for easy updates and scalability. The site also integrates SEO best practices to enhance visibility on search engines.

Asset Management Software

Asset Management Software built with PHP Laravel and React.js offers efficient tracking and management of company assets. The backend ensures robust performance and secure data handling, while the React.js frontend provides a responsive and dynamic user interface. Features include asset registration, assignment, maintenance tracking, and reporting. The software is scalable and customizable to suit various organizational needs. It delivers seamless user experience with modern design and real-time functionality.

More Projects in Potfolio

<https://ruchita.in/>

The website ruchita.in uses modern web technologies for a dynamic user experience. The frontend is built with HTML, CSS, and JavaScript, enhanced by jQuery UI and GSAP (TweenMax) for animations. PHP powers the backend, providing robust server-side functionality. The site runs on the Nginx web server for efficient traffic handling. Overall, it delivers smooth interactivity with optimized performance.
